The Backend Web Development
Section 22

Backend. What's this?

Full-Stack = Front-end + Back-end

Main Components

- **Server**
  - Computer
  - localhost
    - testing
  - listens for requests

- **Application**
  - Logic that runs on server
  - determines how you want to respond to the requests from the browser
  - e.g. Error 404

- **Database**
  - Store Data
  - persist information

Web Application

- **More than web page**
  - e.g. allowing users to log in

- **think of a restaurant**

Tools and Technologies

Front-end

Back-end

Any Programming Language

We will be focusing on:
